OBJECTIVE

 To further my career in information technology and computer programming at new company where I can utilize my expertise as the lead developer

EXPERIENCE

DECEMBER 2018 – MARCH 2022
BCS INTERNATIONAL CORP - LIC, NY
-SOFTWARE DEVELOPER

1. Developed a proprietary ERP program from the ground up using C# Winforms for all departments in the company, including sales, AR, AP, PO, stock, logistics, and Accounting.

2. Created an iPad app for the sales team to send order through a private server, increasing the rate of processing sales and cut back on necessary manual labor.

3. Implemented a barcode scanner for the warehouse and a fully digitized inventory management by LOT number system as well as automation of delivery route planning with Google Map API to cut back on half of the AR and Logistics team members and time unnecessarily spent online.

4. Duplicated the windows server with a Windows Server Virtual Machine in LA to safeguard and back up our server to minimize date loss in case of an emergency

5. Constantly develop, maintain, and review the ERP program and the server to increase functionality, stability, and efficiency of all departments to maximize the productivity of the company

6. Lead collaboration with third party auditing company to assess and certify the ERP program's safety standards
